Hello, I'm Kashish, currently in my third semester of pursuing a Bachelor's in Artificial Intelligence and Machine Learning (B.Tech AIML). Programming has always been a passion, and I'm proficient in languages such as C, C++, and Python, with Python being my primary focus due to my AIML specialization.

I've applied my programming skills to create various projects, including a Smart Matrix AI Calculator using C programming, a Security Lock System, and a Railway Surveillance System. Additionally, I've delved into the realm of deep learning, working with models like YOLO and CNN.

Beyond that, I'm actively engaged in innovation with two ongoing patent projects: a Smart Lamp and a SIM Lock System. In the past year, I've also expanded my expertise as a Full Stack Web Developer, mastering technologies like HTML, CSS, JavaScript, Django, MongoDB, and PHP.

In a nutshell, my journey in AIML, coupled with my programming prowess and a knack for innovation, has led me to explore various facets of technology, from AI and deep learning to web development and patent-worthy creations.

Hello,I'm Kashish,currently in my third semester of pursuing a Bachelor's in Artificial Intelligence and Machine Learning (B.Tech AIML). Programming has always been a passion, and I'm proficient in languages such as C, C++, and Python, with Python being my primary focus due to my AIML specialization. I'm also certified in C programming.

I've applied my programming skills to create various projects, including a Smart Matrix AI Calculator using C programming, a Security Lock System, and a Railway Surveillance System. Additionally, I've delved into the realm of deep learning, working with models like YOLO and CNN.

Beyond that, I'm actively engaged in innovation with two ongoing patent projects: a Smart Lamp and a SIM Lock System. In the past year, I've also expanded my expertise as a Full Stack Web Developer and hold a certification in this field as well. I've mastered technologies like HTML, CSS, JavaScript, Django, MongoDB, and PHP.

In a nutshell, my journey in AIML, coupled with my programming prowess and certifications, has led me to explore various facets of technology, from AI and deep learning to web development and patent-worthy creations
